### Date of production of the KID 01.04.2026

**You are about to purchase a product that is not simple and may be difficult to understand.**

## What is this product?

**Type**
The product is a share class of the Flossbach von Storch SICAV - Multiple Opportunities sub-fund, which is part of Flossbach von Storch SICAV (the "Umbrella Fund"), an open-ended investment company with variable capital (société d'investissement à capital variable – SICAV) that has been established in the form of an umbrella fund and is subject to Part II of the Luxembourg Law of 17 December 2010 (Law of 2010), as amended, and thus qualifies as an alternative investment fund. The assets and liabilities of each sub-fund are segregated by law.

**Term**
The product has an unlimited term. Notwithstanding this, the product may at any time be liquidated by the Management Company. As a rule, investors can redeem their shares on any Luxembourg banking day except 24 and 31 December.

**Objectives**
The investment policy of Flossbach von Storch SICAV - Multiple Opportunities ('subfund') aims to achieve reasonable capital growth in the sub-fund currency, taking into account the investment risk. The sub-fund is actively managed. The composition of the portfolio is determined by the fund manager in accordance with the criteria defined in the investment policy, reviewed regularly and adjusted if necessary. No comparison with a benchmark index is made. In order to achieve its investment objectives, the SubFund generally has the option, depending on the market situation and the assessment of the fund management, to invest in all assets permitted under the Articles of Association and the section "General provisions of the investment policy", including equities, bonds and money market instruments, units in UCITS or UCIs, precious metals, derivatives and demand deposits. The sub-fund invests more than 25% of its net sub-fund assets in equity investments. The sub-fund has the option of investing up to 15% of its net sub-fund assets directly (physically) in gold. In addition, the sub-fund has the option of investing up to 10% of its net sub-fund assets indirectly in gold and other precious metals. For reasons of risk diversification, no more than 10% of the sub-fund's net assets may be invested indirectly in any single precious metal. Detailed information on the above and any other investment opportunities of the sub-fund can be found in the currently valid sales prospectus. This sub-fund may not be suitable for investors who wish to keep their capital invested in the sub-fund for less than 4 years.
This share class distributes the income it generates to investors.
The sub-fund promotes environmental or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088. The fund follows a holistic sustainability approach and, as part of its long-term investment strategy, attaches importance to companies dealing responsibly with their environmental and social footprint and actively counteracting the negative effects of their activities.

**Other relevant information**
BNP PARIBAS Succursale de Luxembourg, with registered office at 60, avenue J.F. Kennedy, L-1855 Luxembourg, Luxembourg, is the Depositary of the Fund. The sales prospectus and the current annual and semi-annual reports, the current share prices and further information on the fund are available free of charge in English at www.fvsinvest.lu .

**Intended Retail Investor**
The product is intended for all types of investor pursuing the aim of asset formation and/or asset optimisation and planning to invest in the medium to long term. They should be in a position to bear losses up to the amount of the capital invested. This Fund is a product for customers with basic knowledge of and/or experience with financial products.

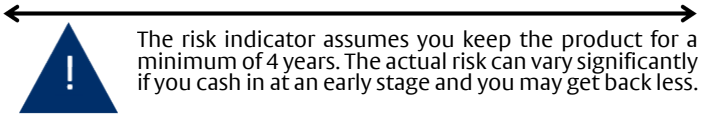
Flossbach von Storch

## What are the risks and what could I get in return?

**Summary Risk Indicator**

1 2 **3** 4 5 6 7

Lower risk — Higher risk



The risk indicator assumes you keep the product for a minimum of 4 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
Unusual market conditions could arise, for example, due to currency, creditworthiness, price, counterparty, liquidity and interest rate risks, as detailed in the sales prospectus.
We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the Fund's capacity to pay you.
This product does not include any protection from future market performance. Please refer to the 'Risk' section of the sales prospectus for more details.

## Performance scenarios

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**
The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

**Recommended minimum holding period: 4 years**

**Example Investment: 10,000 EUR**

| Scenarios | | If you exit after 1 year | If you exit 4 years |
|---|---|---|---|
| **Minimum:** | There is no minimum guaranteed return. You could lose some or all of your investment. | - | - |
| **Stress scenario** | What you might get back after costs | 5,780 EUR | 5,150 EUR |
| | Average return each year | -42.20% | -15.29% |
| **Unfavourable scenario** | What you might get back after costs | 8,310 EUR | 9,530 EUR |
| | Average return each year | -16.90% | -1.20% |
| **Moderate scenario** | What you might get back after costs | 10,130 EUR | 11,730 EUR |
| | Average return each year | 1.30% | 4.07% |
| **Favourable scenario** | What you might get back after costs | 11,650 EUR | 13,650 EUR |
| | Average return each year | 16.50% | 8.09% |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor/and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances.
Unfavourable scenario: This type of scenario occurred for an investment between February 2025 and February 2026.
Moderate scenario: This type of scenario occurred for an investment between May 2020 and May 2024.
Favourable scenario: This type of scenario occurred for an investment between August 2017 and August 2021.

## What happens if Flossbach von Storch Invest S.A. is unable to payout?

The sub-fund assets are segregated from the assets of the Management Company. The Depositary is responsible for holding the assets of the fund in safekeeping. If the Management Company defaults, it will have no direct financial effect on the sub-fund. In addition, the sub-fund assets are segregated from the assets of the Depositary, which reduces the risk of the sub-fund suffering a loss if the Depositary defaults. There is no investor compensation or guarantee scheme if the Management Company or the Depositary defaults.

Flossbach von Storch

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:
We have assumed:
- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR is invested.

| | If you exit after 1 year | If you exit 4 years |
|---|---|---|
| **Total costs** | 618 EUR | 1,181 EUR |
| **Annual Cost Impact (*)** | 6.2% | 2.5% per year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.6% before costs and 4.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|---|---|
| **Entry costs** | 5.00% of the amount you pay in when entering this investment. These costs are already included in the price you pay. | Up to 500 EUR |
| **Exit costs** | We do not charge an exit fee. | 0 EUR |
| **Ongoing costs** | | |
| **Management fees and other administrative or operating costs** | 1.12% of the value of your investment per year. This is an estimate based on last year's actual costs. | 112 EUR |
| **Portfolio transaction costs** | 0.06% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 6 EUR |
| **Incidental costs taken under specific conditions** | | |
| **Performance fee** | There is no performance fee for this product. | 0 EUR |

## How long should I hold it and can I take my money out early?

Recommended minimum holding period: 4 years
The recommended holding period for the sub-fund is 4 years, as the sub-fund invests for the long term. Investors can sell their shares upon demand on any valuation day (as defined in the sales prospectus). Further information on the sales procedure and when sales are possible is provided in the "Redemption and exchange of shares" section of the sales prospectus. The management company may use appropriate liquidity management tools to control liquidity risk. Detailed information on this can be found in the current prospectus.

## How can I complain?
